UNNATI YOGI

FULL STACK & AI/ML DEVELOPER

unnatiyogi170@gmail.com | +91 7999641357 | LeetCode | LinkedIn | GitHub

Profile Summary

Driven Computer Science student and Full Stack & AI/ML Developer with a strong foundation in DSA and software engineering. Proficient in React.js, Node.js, Python, MongoDB, Machine Learning, Generative AI, LLMs, and RAG. Solved 400+ LeetCode problems, demonstrating strong analytical and problem-solving abilities. Passionate about engineering scalable, intelligent, and impactful solutions while continuously advancing technical expertise.

Technical Skills

Programming Languages:	C++,Python
Web Technologies:	HTML, CSS, JavaScript, React.js, Node.js, Express.js
Databases & Tools:	MongoDB, GitHub
AI/ML:	Scikit-learn, Pandas, NumPy, Machine Learning, RAG, LLM Integration
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Education

Rustamji Institute of Technology **2023 – 2027**
Bachelor of Technology CGPA: 8.28

Sonali Public School **2022 – 2023**
Senior Secondary (Class XII) Percentage: 80

Projects

CivicFix AI – AI-Powered Civic Complaint Management Platform GitHub Live
React.js, Node.js, MongoDB, FastAPI, Python, Scikit-learn, JWT

- Built an AI-driven civic complaint platform that classifies incoming complaints and supports priority prediction, severity analysis, and duplicate detection.
- Implemented JWT-based authentication and role-based workflows, supporting distinct access and responsibilities for citizens, administrators, and government users.
- Developed an end-to-end resolution workflow with evidence verification, rework handling, and citizen confirmation or complaint reopening.

Nexus Core – Intelligent Volunteer Allocation System GitHub Live
React.js, Node.js, Express.js, MongoDB

- Developed a full-stack volunteer management platform to organize community tasks, maintain volunteer information, and manage task assignments.
- Implemented volunteer-task allocation using location, volunteer availability, and task urgency to support more relevant assignments.
- Built a centralized dashboard to monitor tasks, coordinate volunteers, and manage assignments from one place.

Student Mental Health Prediction | Machine Learning GitHub Live
Machine Learning, Scikit-learn, Pandas, NumPy

- Developed a Random Forest classification model to predict student mental health outcomes using behavioral and academic data.
- Performed data preprocessing and feature analysis, then trained the model using Scikit-learn.
- Evaluated model performance with classification metrics and refined the model through tuning.

Achievements

- **Google Developer Groups (GDG) | Co-Lead:** Co-led the GDG team, coordinating events, managing team activities, and supporting community engagement.
- **LeetCode:** Solved 400+ DSA problems, strengthening problem-solving and algorithmic skills.

Leadership

- **Club Leader – GeeksforGeeks Coding Club:** Led coding activities, encouraged peer participation, and supported students in problem-solving and programming. Coordinated coding-related activities and collaborative learning sessions within the college community.

Soft Skills

Leadership:	Team Leadership, Teamwork & Collaboration
Professional:	Problem Solving, Communication, Time Management, Adaptability
